

Meaghan Hartie
Andre Porter
Final Project
Web Design Studio

Goal:

The project is going to be an interactive experience from the movie *Clerks 2*. The goal is to show the user and seeing interactivity among the characters with the humorous life from the movie. We want people to have a fun time with this project and come back again for another dose of laughs. The main reason why we are creating this project because we feel that we need a break from the serious tone of creating from the midterm that is cmacweb or uarts radio, plus its fun. And brings a bunch of laughs to the project will make people lighten up a bit.

Audience:

Young adults will be the primary audience, while the Kevin Smith fans and the teenagers will be secondary audience.

Site Content:

Parody of pop culture reference

Suburban feel of New Jersey

Background images of the Mooby's restaurant. Managers office, back alley, kitchen/register, computer terminal area, front of restaurant

Animated Characters

Foreground Images
